Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's election of the invention of Group III, Claims 27-32, by the cancellation of Claims 1-12, filed 7/02/04, is acknowledged. Applicant's submission of new Claims 33-54 has necessitated an additional species election.

2. This application contains inventions drawn to patentably distinct species. Applicant is required under 35 U.S.C. § 121 to elect:

A) a plurality of dendritic cell/tumor cell hybrids wherein the dendritic cell is either a dendritic cell or a dendritic cell progenitor,

B) should Applicant elect dendritic cell, Applicant is further required to elect either a dendritic cell of lymphoid origin or a dendritic cell of myeloid origin,

B) and list all Claims readable thereon including those subsequently added. Currently Claims 27-44 and 49-50 are generic.

3. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Dendritic cells and dendritic cell progenitors comprise significantly different immunological properties. For example, whereas a dendritic cell would comprise a terminally differentiated cell with antigen presenting capabilities, a dendritic cell progenitor would not. A dendritic cell progenitor would more likely comprise a CD34+ stem cell or other more undifferentiated cell type with essentially no immunological properties. Accordingly, the species are independent and patentable over one another.

4. Applicant is advised that the response to this requirement to be complete must include an election of the species to be examined even though the requirement be traversed.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (571) 272-0843. The examiner can normally be reached Monday through Thursday from 7:30 am to
